

ANDRI

I'm a fullstack developer in PT ADEAKSA INDO JAYATAMA who usually uses java and php as the backend and for the frontend I use angular and flutter. I am a person who likes to learn new things, I am proficient in English, making it easier for me to read documentation that uses mostly English, and makes it easier for me to overcome bugs in my project. I want to find a new experience in a new work place to learn more and help in dealing with your company's problems.

HOBBIES

- Learning
- Travelling
- Reading
